Sage 300 ERP Integration Fact Sheet

Specializing in bi-directional Sage solutions that are scalable, affordable, seamless and agnostic!

Features

Our Sierra integration synchronizes employee and payroll data between **Sage 300 ERP** and **TimeMaster™** with the click of a button.

Our standard out-of-the-box integration is bi-directional and updates employee information, including department, job, supervisor, and much more directly into TimeMaster directly from **Sage 300 ERP** so there is no double entry. It also interfaces your TimeMaster time and attendance data including time punches, pay codes, job codes, absence codes, disbursements, shift codes (and more) directly into **Sage 300 ERP**, making payroll a breeze.

See page two for more info and screen shots! ▸
