

TimeMaster™ Integration Application

Sierra Workforce Solutions' TimeMaster Integration Application (TIA) provides a bi-directional bridge between a given timekeeping package and a given accounting / payroll package. TIA was built to save a broad range of businesses both time and money.

Major accounting packages supported:

- Dynamics GP US and Canadian Payroll
- Dynamics GP Project Accounting
- Dynamics NAV
- Sage 100 ERP, both Payroll and Work Order
- Sage 300 ERP, US and Canadian Payroll
- Sage HRMS with Accpac Payroll
- Sage BusinessWorks Accounting
- WennSoft
- ...and more!

Timekeeping packages supported:

- TimeMaster TA100
- TimeMaster Pro (Foxpro (VFP))
- TimeMaster (SQL)
- TimeMaster Web
- TimeMaster Ascend
- TimeMaster Summit

Sierra's TIA transfers data in two directions – it populates a timecard system database with employee and organizational information from the accounting/payroll system, and passes timecard data from the timecard system to the accounting/payroll system.

Settings are configurable to meet your unique requirements!

- Support for a distributed network structure – install on the desktop of the person who does the work
- Support for multiple companies in both accounting and payroll systems
- Transfer organization data directly from your accounting/payroll system into your timecard system
 - **YOU** decide what organizational data is transferred
 - Options include departments, positions, and job cost data
- Transfer employee data directly from your accounting/payroll system into your timecard system
 - Complies with the national HIPAA privacy directives
 - **YOU** decide what employee data is transferred
 - Options for transfer include vacation and sick leave balances
- Transfer timecard data directly from your timecard system to the accounting/payroll system
