

# Microsoft Dynamics GP Payroll Integration

*Specializing in bi-directional Dynamics solutions that are scalable, affordable, seamless and agnostic!*

## Features

Our Sierra integration synchronizes employee and payroll data between **Microsoft Dynamics GP** and **TimeMaster™** with the click of a button.

Our standard out-of-the-box integration is bi-directional and updates employee information, including department, job, supervisor, and much more directly into TimeMaster directly from **Microsoft Dynamics GP** so there is no double entry. It also interfaces your TimeMaster time and attendance data including time punches, pay codes, job codes, absence codes, disbursements, shift codes (and more) directly into **Microsoft Dynamics GP**, making payroll a breeze.

*See page two for more info and screen shots! ▶*

## Highlights

*Capable of supporting multi-company, each within its own database!*

### Table Data Synced:

US Payroll Module

- *Employee Data Table*  
*Over 30 fields, employee and organizational information*

HR Module

- *Union Table*  
*Seniority Dates*

Miscellaneous Module

- *Internet Table*  
*Email Address*

### Optional Features:

- *Choose default value override in GP for dept., position, pay rate rather than timecard values*
- *Default batch codes or user defined batch codes*

### Bi Directional Interface:

- *Configure and GO! Enter data once, changes port to GP/payroll database and/or time and attendance database*

### Technical Support:

- *Knowledgeable and responsive support team from project start and beyond...*
