

# Microsoft Dynamics GP Project Accounting Integration

*Specializing in bi-directional Dynamics solutions that  
are scalable, affordable, seamless and agnostic!*

## Features

Our Sierra integration integrates your time and attendance system to your **Microsoft GP Project Accounting** with the click of a button. Our bi-directional out-of-the-box interface allows you to update employee and organizational information from the same place as your U.S. Payroll for **Dynamics GP** so there is no double entry. With features like allowing you to link cost categories to specific projects and associate an employee or position rate to a cost category, you'll benefit from a tighter integration between systems aligning with **Microsoft GP Project Accounting's** goal to connect project activities with company financials and helping to ensure accurate accounting and billing processes throughout project life-cycles, streamlining time and expense management.

*See page two for more info and screen shots! ▶*

## Highlights

**Integrated with Dynamics GP US Payroll, including employee & organizational information**

**Link cost categories to specific projects**

**Associate an employee or position rate table to a cost category**

### Table Data Synced:

US Payroll Module

- *Employee Data Table*  
-Over 30 fields, employee and organizational information

Projects

- *number, name, description & status*

Cost Categories

- *tracks cost categories across projects utilizing cost category id, name and transaction usage-timesheet only*

Budget Master

- *utilizes Budget Master, can track project number, status, cost category, ID and transaction usage-timesheet only*

### Bi Directional Interface:

- *Configure and GO! Enter data once, changes port to your GP/ payroll database and/or time and attendance database*

### Sierra's Technical Support:

- *Knowledgeable and responsive support team from project start and beyond...*
